Smart
Security

Classe 300EOS with Netatmo is the new 2 wires / Wi-Fi handsfree connected video internal unit with built-in Amazon Alexa voice assistant. Using the Home + Security App, in addition to video door entry calls, it is also possible to manage the devices of the Netatmo security range, creating a simple and fast Smart security system.

CLASSE
300EOS | WITH Netatmo

Change your idea of a video internal unit.

The smart vision of the home.

Distinctive design to meet the needs of contemporary living. Vertical and super slim. With its clean and modern design, it gives every type of home an innovative look, and offers a unique user experience.

Vertical display and curved shape:
a disruptive and modern design,
but also understated.

5" Touch Screen

Vertical display
for a better view
of the caller

Face detection

Automatic centring of the
subject on the display

Horizontal display

Double "tap" the display
to view the image
in landscape format

Curved shape

The shape of a welcome:
a "welcoming effect"
for residents and guests.

Advanced interface.

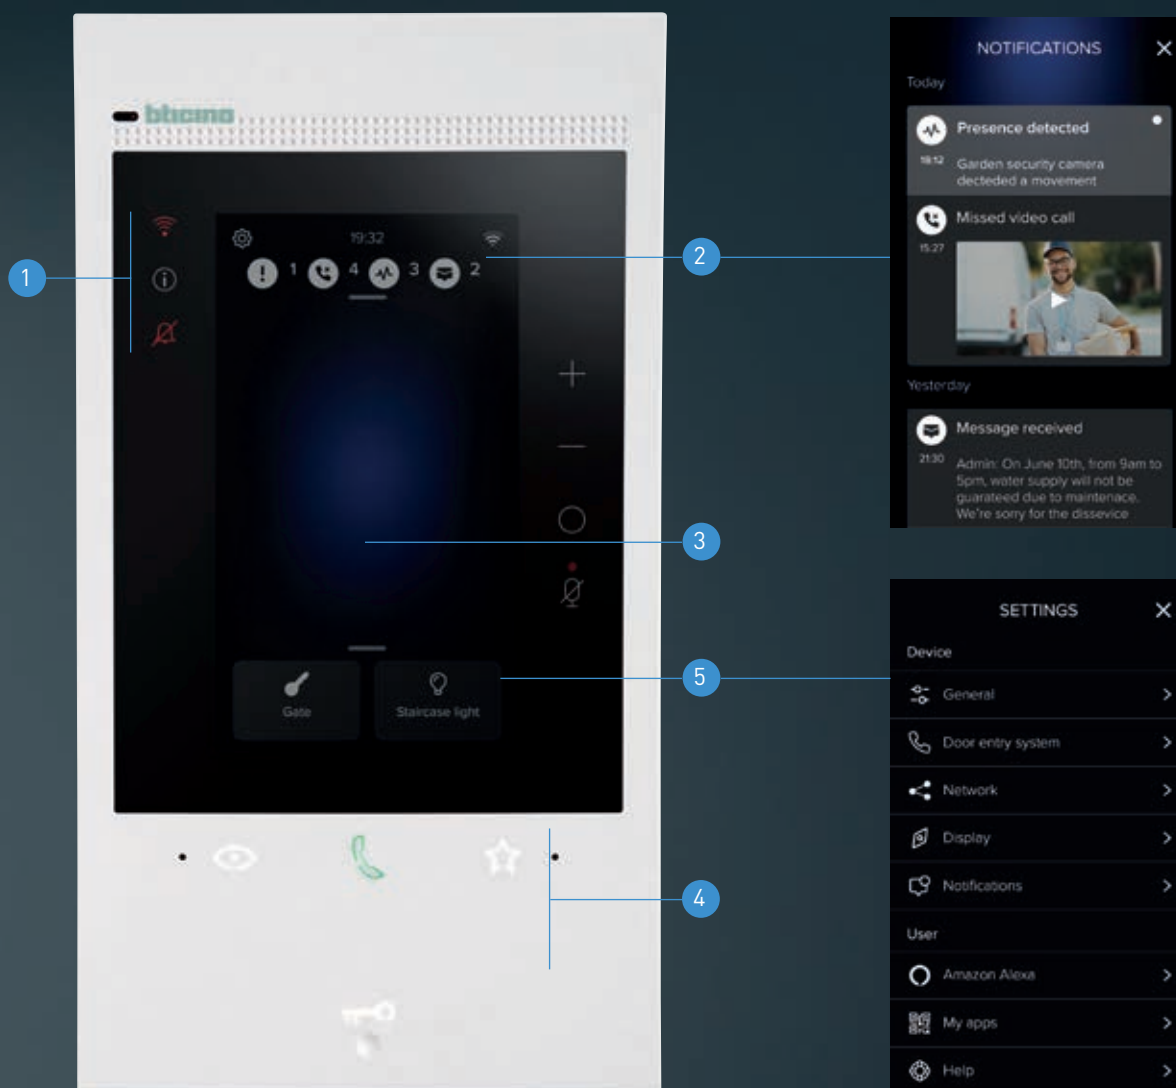

Intuitive use

For simple smartphone-like gestures (swipe function)

Quick tips

To guide you and suggest in a dynamic way

- 1 Led**
- Wi-Fi connection status
 - Presence of notifications
 - Ringtone exclusion

- 2 Notifications**
- Missed calls
 - Messages
 - System information

- 3 Suggestion area**
- Guided configurations
 - System information
 - Last notification
 - Useful tips

- 4 Door entry functions**
- Activate the camera
 - Answer the call
 - Favourite functions
 - Activation of the electrical door lock

- 5 Favourite actions**
- 2 quick actions
 - Favourite menu

Always aware with the Home + Security App

Home + Security

The best App for a safe home

Alerts and notifications for incoming calls, motion and people detection, event information and door lock management with a simple and intuitive interface.

Answer the calls,
activate the electrical door locks,
activate the cameras and display
the timeline of the events

Manage up to 20 homes
with your single account

Home + Security

Incoming call

Receive notification
when someone
is calling

See who's calling

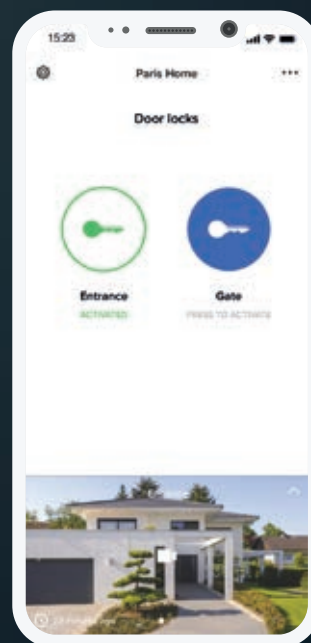

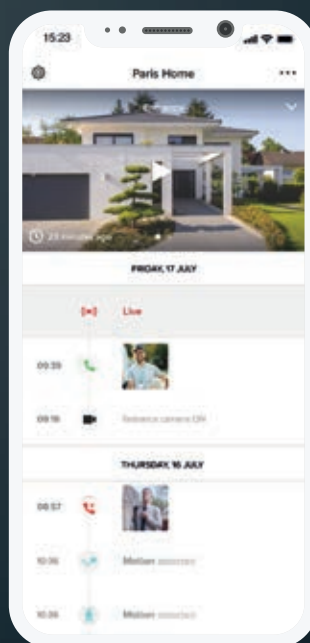

Answer the call and
open the gate for
the courier

Check the events

Check who called you
and if they left you
a message

Quick actions

- Activate the electrical door locks
- Activate the timed staircase lights
- Call home / Intercom
- Activate the cameras
- Manage the video door entry answering machine

Security enhancement with integration of Netatmo devices

Video door entry system and security. Together.

Video door entry system

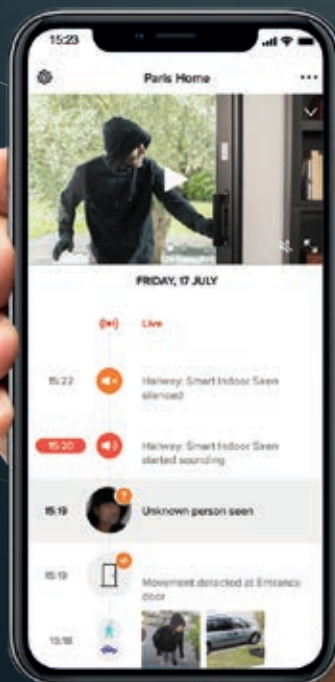

Main entrance
Incoming entrance call.

Security

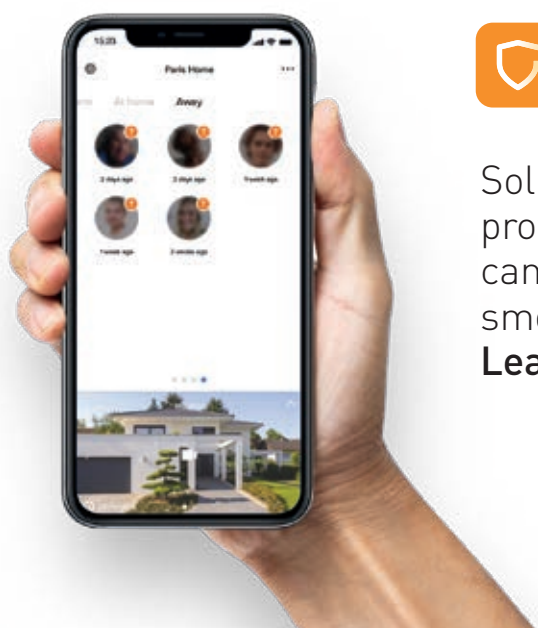

Secondary entrance and interiors
Smart Outdoor Camera with Siren and movement detection. Smart Indoor Camera with face recognition.

A single App with an intuitive home page. It allows you to answer video door entry calls, activate the door lock and view images from Netatmo smart outdoor and indoor cameras.

Professional opportunity: offer your services as an installer of simple smart security systems.
Business opportunities: access to a catalogue of smart and easy-to-install security devices.

Home + Security The best App for a safe home.

Solutions for a smart and complete protection of your home: security cameras, alarms, opening sensors, smoke detector...

Leave your home without worries.

ALEXA BUILT-IN

The first video internal unit with built-in Alexa

Enjoy the full Alexa experience
interacting with all its functions, such as:
Custom routines - Play Music - Smart Home
To set the clock alarms - Memos and
video door entry functions.

Add any compatible “works with Alexa” devices, to offer your customers an increasingly Smart home.

“Alexa, open the gate”

“Alexa, answer the call”

“Alexa, I go out”

NOTE: Alexa is not available in all languages and Countries.
Alexa features and functionality may vary by location.

2 wires standard installation

Wall mounted installation using the bracket supplied with no need of masonry works. Built-in Wi-Fi connectivity and same installation rules as for the 2 wires video internal units.

No changes to your working habits.
Same installation rules as for the 2 wires video internal units.

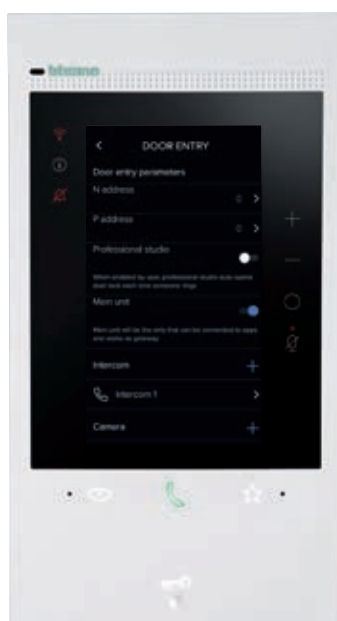

Forget complex installations and configurations of Ethernet networks, and continue to enjoy the **simplicity of 2 wires solutions**. Everything stays the same thanks to the Wi-Fi technology integrated in the video internal unit.

Simple and intuitive configuration

The configuration requires no IT skills.

You must only configure the classic 2 WIRES system parameters (entrance panel and internal unit SCS addresses, etc.). Your customer manages all the configurations of the Wi-Fi network and the App independently and intuitively. If necessary one can follow the information on the video door entry display and inside the Home + Security App menu.

Installation, connection of the two BUS wires, configuration of the main system parameters: job done!

Immediate and simple to associate

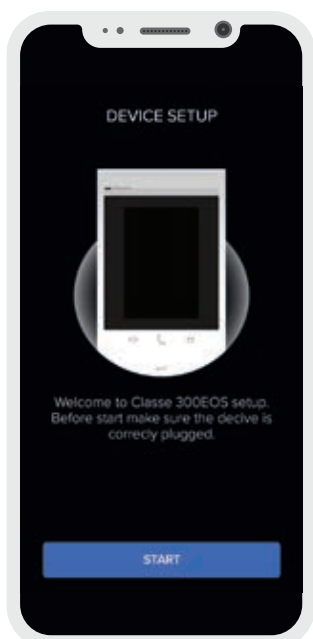

After the App download, a guided procedure allows the association between smartphone and Classe 300EOS.

A few simple guided steps to complete the association of the App with the video internal unit

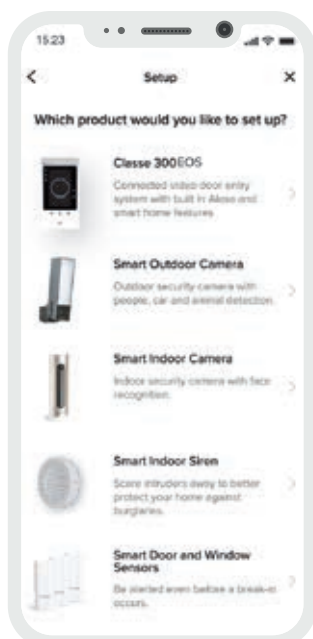

1

After downloading the H+S App to your smartphone from the store or using the QR code on the video internal unit, simply select «START CONFIGURATION».

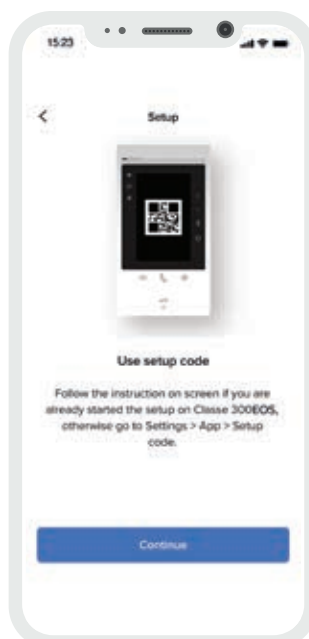

2

Select the Classe 300EOS device in the H+S App menu.

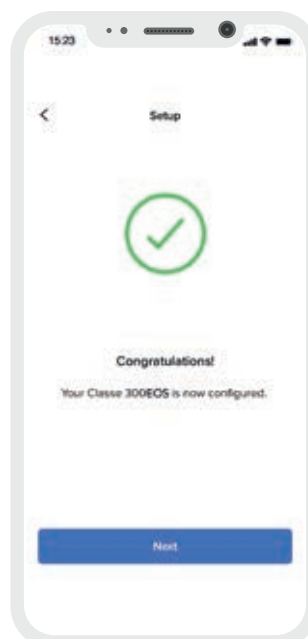

3

The video internal unit has a QR Code, which can simply be framed in the H+S App to complete the association within the same Wi-Fi network.

4

After the association, the device is configured and ready for use.

The connection to the dedicated Cloud totally and safely automates the configuration on the home network (you do NOT need to configure your router). The video internal unit transfers all the configuration of the 2 WIRES video door entry system (cameras, door locks, activations etc.) to the App. From Smartphone, using the App, you can always display the mobile devices associated to it and decide which to disconnect or cancel at any time.

Suitable for all home environments

INSTALLER INFO

Built-in connectivity for constant connection with the home.

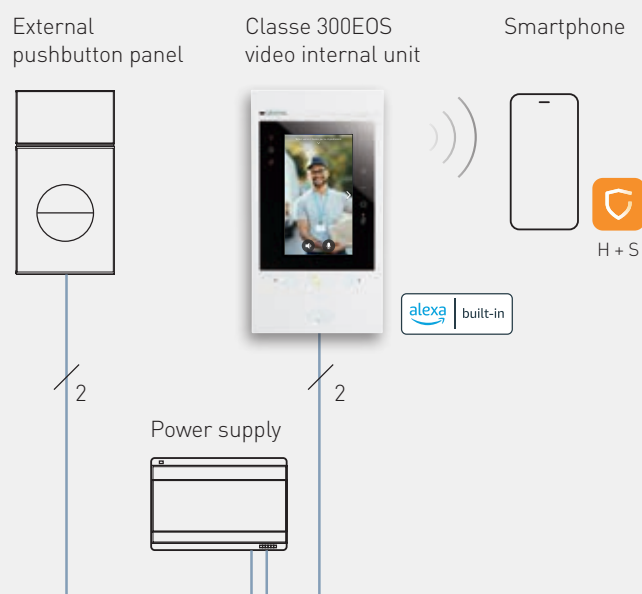

Complete the system with Netatmo security solutions: outdoor and indoor cameras, alarms, opening sensors, smoke detectors, for a simple, smart and complete protection of the home.

One single App (Home + Security) for the video door entry functions and the security of the home.

No extra work for the installer; easier to use for the end user.

FOR THE VILLA OR FOR ONE&TWO-FAMILY CONTEXT

The easiest way to make your home safer.

REAL ESTATE AND INSTALLER INFO

Alexa ready apartments,
for a first level Smart Home.

Preparation of the single apartment system
for future expansions using Netatmo security
solutions. Leaving to the end user the freedom
to customize their home even at a later date.

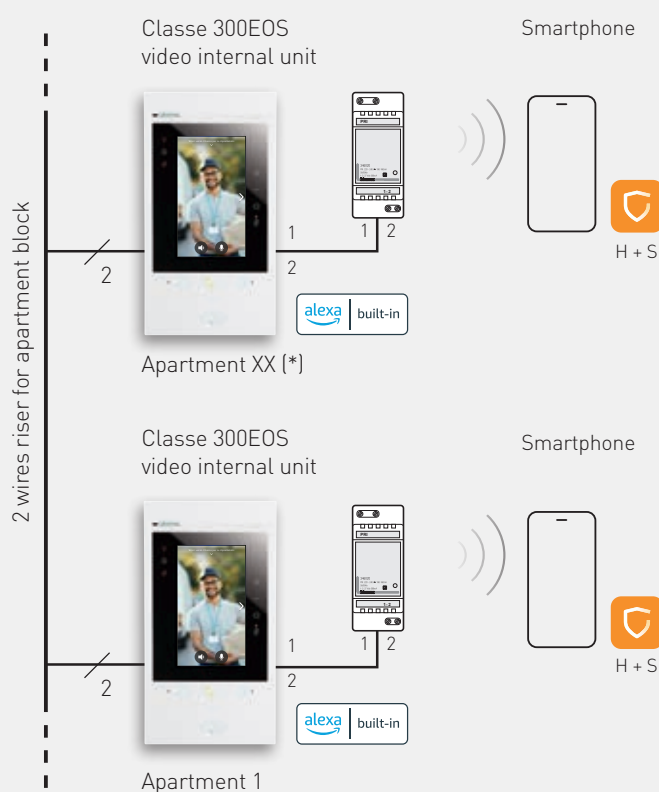

One single App (Home + Security)
for the video door entry functions
and the security of the home.

Flexible solution, suitable for every context
and adaptable to every customer.

Warning: in multi-family systems (apartment blocks)
you need the extra power supply of the CLASSE 300EOS
video internal unit (install 1 extra power supply
346020 for each Classe 300EOS).

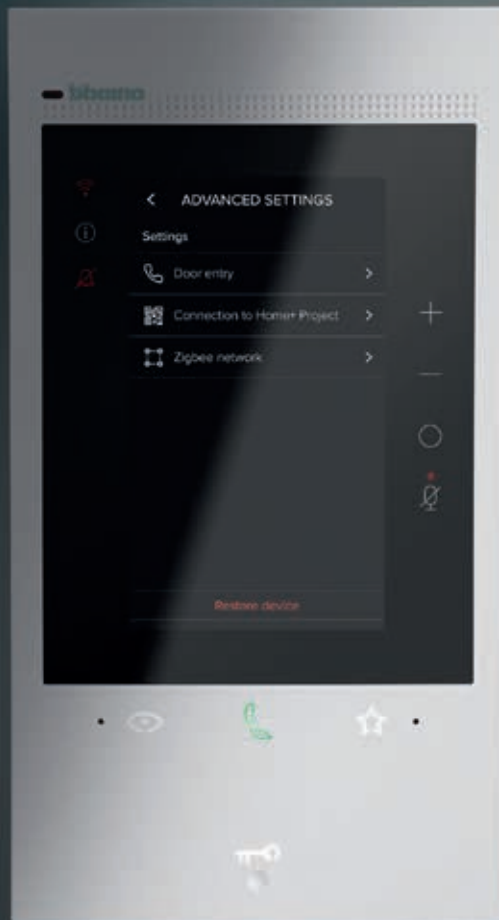

FOR APARTMENT BLOCK OR MULTI-FAMILY CONTEXT

Install, configure and activate
the system on location. All that
your customer will then need to
do, is to associate the H + S App to
the system using their smartphone.

NOTE: for the sizing of multi-family systems refer to the General Installation
Standards of the 2 Wires System Technical Guide.

New functions coming

The device firmware updates will soon allow you to use new and innovative Smart Home features...

Stay connected!

Flexibility and savings:
for a Smart Home there is no need for additional gateways or web servers:
you can choose the technology that you prefer.

A Smart Home with a simple App

HOME + SECURITY
to manage all the video door entry and security functions inside and outside the home.

HOME + CONTROL
to always have Smart functions (lights, sockets, shutters, temperature control) at hand... inside and outside the home.

Item

CLASSE 300EOS WITH NETATMO CONNECTED VIDEO INTERNAL UNIT

344842

2 wires/Wi-Fi handsfree connected video internal unit with built-in Amazon Alexa voice assistant, 5" vertical touch screen LCD display and video door entry answering machine. It has a physical key for door lock release and capacitive keys for the control of the main video door entry functions: handsfree communication, entrance panel activation / camera scrolling and Favourite key (can be configured to activate the quick actions most frequently used – e.g. additional door locks, staircase light control, intercom). There are notification LEDs for: Wi-Fi network connection status, info / notifications and call exclusion. It is possible to easily interact with the built-in Alexa voice assistant, either using the dedicated capacitive keys or with your voice, and activate several functions, such as the video door entry functions, Smart Home, scenarios, reminders etc. Using the touch display, it is possible to access the notification list, as well as your favourite door entry, security and Smart Home controls (if any). Possibility of voice communication with the switchboard - if present in the system - after a specific call. The device must be configured by physically connecting the configurators, or using the menu, which will give better possibilities of customisation of associated functions and texts. Thanks to the Wi-Fi connection, you can associate the video internal unit to the Home + Security App (available for Android and iOS). The App allows to use the main video internal unit functions (receiving calls, door lock release, display of the event timeline and activation of the entrance panel/camera cycling). Through the Home + Security App, it is also possible to manage the products of the Netatmo security range (outdoor and indoor cameras, door and window sensors, indoor siren and smoke detector). This allows you to quickly and easily create a Smart security system. The device also allows to create and manage Smart Home functions, using the wired SCS BUS solution or the Zigbee solution, without the need for adding dedicated gateways. Wall mounted installation using the supplied bracket Possibility of Wi-Fi connection or using RJ45 ethernet cable with the dedicated accessory 344844.

Item

ETHERNET ACCESSORY

344844

Accessory cable for the wired connection of the Classe 300EOS video internal unit using an RJ45 Ethernet cable. To be purchased separately.

Item

2 DIN ADDITIONAL POWER SUPPLY

346020

Additional 2 DIN power supply to be used to supply the connected CLASSE 300EOS video internal unit (344842) locally, when required.

They only work with the smart indoor camera (sold separately): radio link between the sensors and the camera. Declaration of conformity and FCC. Open-source compatibility. Can be controlled and managed remotely with Home + Security app.</p>

NDB - PRO

NSA - PRO - EU

NIS - 01 - PRO

NCO - PRO

Item	SMART VIDEO DOORBELL
NDB-PRO	Smart video doorbell for outdoor installation. Allows you to receive a video call on your smartphone when someone rings the doorbell. Equipped with Camera: 2 megapixels, 5x digital zoom. HDR function of automatic adaptation to lighting conditions. Infrared night vision even in conditions of total absence of brightness. Video: Full HD 1080 p, portrait format 9:16. Field of view: 140° diagonal. Sound: high-quality speaker and microphone. Night vision: Infrared LED. Operating temperature: -10° to 40° C. Weather resistant: H2O protection and IP44 certification. Power supply: 8-24 VAC & 230 VAC; minimum 8 VA. Local storage on microSD memory card and optional storage on Dropbox or FTP server MicroSD card up to 32 GB (class 10). Data protection with encrypted connection for the highest level of privacy. Requirements: high speed internet access. The minimum required upload and download speed is 25 KB/s. Hotspots are not supported. Wireless specifications: Wi-Fi 802.11 b/g/n (2.4 GHz), Open/WEP/WPA/WPA2-personal. Operation via Home + Security app (iOS 10 required minimum - Android 5.0 required minimum). Compatible with Apple HomeKit, Google Assistant and Amazon Alexa. www.bticino.com

Item	SMART SMOKE ALARM
NSA-PRO-EU	Smart Smoke Alarm with 85 dB alarm, high performance photoelectric sensor, average coverage 50 m ² . When it detects the presence of smoke, it activates its 85-decibel alarm and immediately alerts you to your smartphone. It is equipped with a 10-year battery - the maximum lifetime for all smoke detectors. The Self-Test feature checks if the Smart Smoke Alarm is functioning correctly. If it detects a problem, it sends a notification to your smartphone. Reliability guaranteed by CE (EN 14604) and NF certifications. Standalone device, no hub required. Compatible with Apple HomeKit. Operation via the Home + Security app. Requirements: High-speed wireless internet connection needed. Public hotspots not supported. The Smart Smoke Alarm will detect smoke and will sound even if the Wi-Fi isn't configured. However, you will need Wi-Fi to receive smartphone alerts. Wi-Fi 802.11 b/g/n (2.4 GHz), Open/WEP/WPA/WPA2-Personal, Bluetooth Low Energy (BLE).

Item	SMART INDOOR SIREN
NIS-01-PRO	Smart indoor siren with 110 dB alarm, pre-recorded sounds and vibration sensor for tamper detection. Battery power supply or with a cable (not supplied) using the USB micro port. It only works with the smart indoor camera and must be installed in the same room: Bluetooth Low Energy (BLE) wireless connection with the smart indoor camera. Declaration of conformity and FCC declarations. Open-source compatibility. Operation using the Home + Security app.

Item	SMART CARBON MONOXIDE ALARM
NCO-PRO	Smart carbon monoxide alarm / detector for wall installation. It allows to monitor the fuel-burning appliances (boiler, fireplace, wood-burning stove, gas cooker, etc.) by measuring, in real time, the levels of carbon monoxide, which is an invisible, odourless and potentially fatal gas. When it detects the presence of carbon monoxide, it activates its 85-decibel alarm and immediately alerts you to your smartphone. It is equipped with a 10-year battery - the maximum lifetime for all carbon monoxide detectors. The Self-Test feature checks if the Smart Carbon Monoxide Alarm is functioning correctly. If it detects a problem, it sends a notification to your smartphone. Reliability guaranteed by CE (EN 50291) and NF certifications. Standalone device, no hub required. Compatible with Apple HomeKit. Operation via the Home + Security app. Requirements: High-speed wireless internet connection needed. Public hotspots not supported. The Smart Carbon Monoxide Alarm will detect Carbon Monoxide and will sound even if the Wi-Fi isn't configured. However, you will need Wi-Fi to receive smartphone alerts. Wi-Fi 802.11 b/g/n (2.4 GHz), Open/WEP/WPA/WPA2-Personal, Bluetooth Low Energy (BLE).

Dimensional data

Classe 300EOS with Netatmo

Legal notes

To use the video door entry call repeat service on a smartphone, the customer must acquire the technical equipment which allows access to the Internet, on the basis of an agreement made by the customer himself with an ISP (Internet Service Provider). BTicino plays no part in this. The customer must install the Home + Security App on his smartphone so that he can use some services which BTicino supplies as extras to the normal basic functions of the Classe 300EOS video internal unit. The services offered by means of the App require being able to interact with Classe 300EOS remotely and through the Internet. In these cases, the integration and good working between the video internal unit and App may depend on:

- a) quality of the Wi-Fi signal;
- b) type of access contract to the home internet;
- c) type of data contract on the smartphone

When one of these 3 elements does not conform with the specifications required for product operation, BTicino accepts no responsibility for any faults. The product supports a VoIP streaming system. You must therefore check with your smartphone contract – data network – that it does not block it. We should also like to inform you that the service provided by BTicino – remote use via App – involves the use of data. The cost linked to data usage depends on the type of contract which the customer has with his ISP (Internet Service Provider) and is solely the customer's responsibility.
